

DECIMATOR

32K only

Written by
Michael Boyd
For Poseidon Software

It is the year 2000. Again Earth is under attack from a hostile race of aliens from a far-off galaxy. In the year 2000, Earth faced a similar threat from these unknown enemies, their objectives unknown.

But the people of Earth learned from the 2000 invasion and sought to reconstruct the ruins of the planet, entrusting their future in a fleet of highly sophisticated space fighters, the key to the defence network set up to defend against future invasion.

Code-named 'Declinator' you have been chosen to pilot the fleet against the aliens in an attempt to destroy this new threat to the Earth and safeguard the future of mankind.

How to Play

Use keys: - A-up J-down left_right_space-fire, hyperspace-GRABH smartbomb-CLR.

Define you own keys by pressing 'DEFINE' when on the title screen. To use joystick, define stick directions in 'define key' mode.

How to Load

Type LOAD (CR) and press PLAY/LOAD on tape. When 'Loading End' comes up, press (CR) and wait for the programme to load.
